

Re-Provisioning of Clinical Systems

What do we want for 2017?

22nd September 2015

Draft V1.0

Dr Neil Kelly & Dr Bruce Thomson

Welcome and Introductions

Workshop Objectives

1. What is the GPIT Re-provisioning project?

- The driving principles
- What “we” are aiming to achieve

2. What could be better in relation to your primary care environment?

- Current problems and future fears? (in general)
- What IT requirements are essential?
- What IT requirements are desirable/ nice-to-have?

GPIT Re-provisioning Objectives

A simple and efficient re-provisioning exercise to establish a flexible contractual arrangement that is fit for purpose now and can be easily added to as future requirements evolve.

This vehicle should:

- Take GP IT 5 + years into the future
- Increase levels of contractual influence and control over the system vendors
- Encompass an increased, pre-defined and controlled breadth of functionality
- Consider evolving Scottish Government Strategies (GMS, OOHs, Health & Social Care)
- Support evolving models of care

Overview of the contractual process.....

Step 1 WHAT to buy?

- Software – GP, Community, Other S/W
- Interoperability – with respect to SEF
- MTS – Hosting, DR, Support
- Development

DRIVING PRINCIPLES

- Business Needs
- Strategic Fit
- Contractual Rigour
- Viability
- Affordability

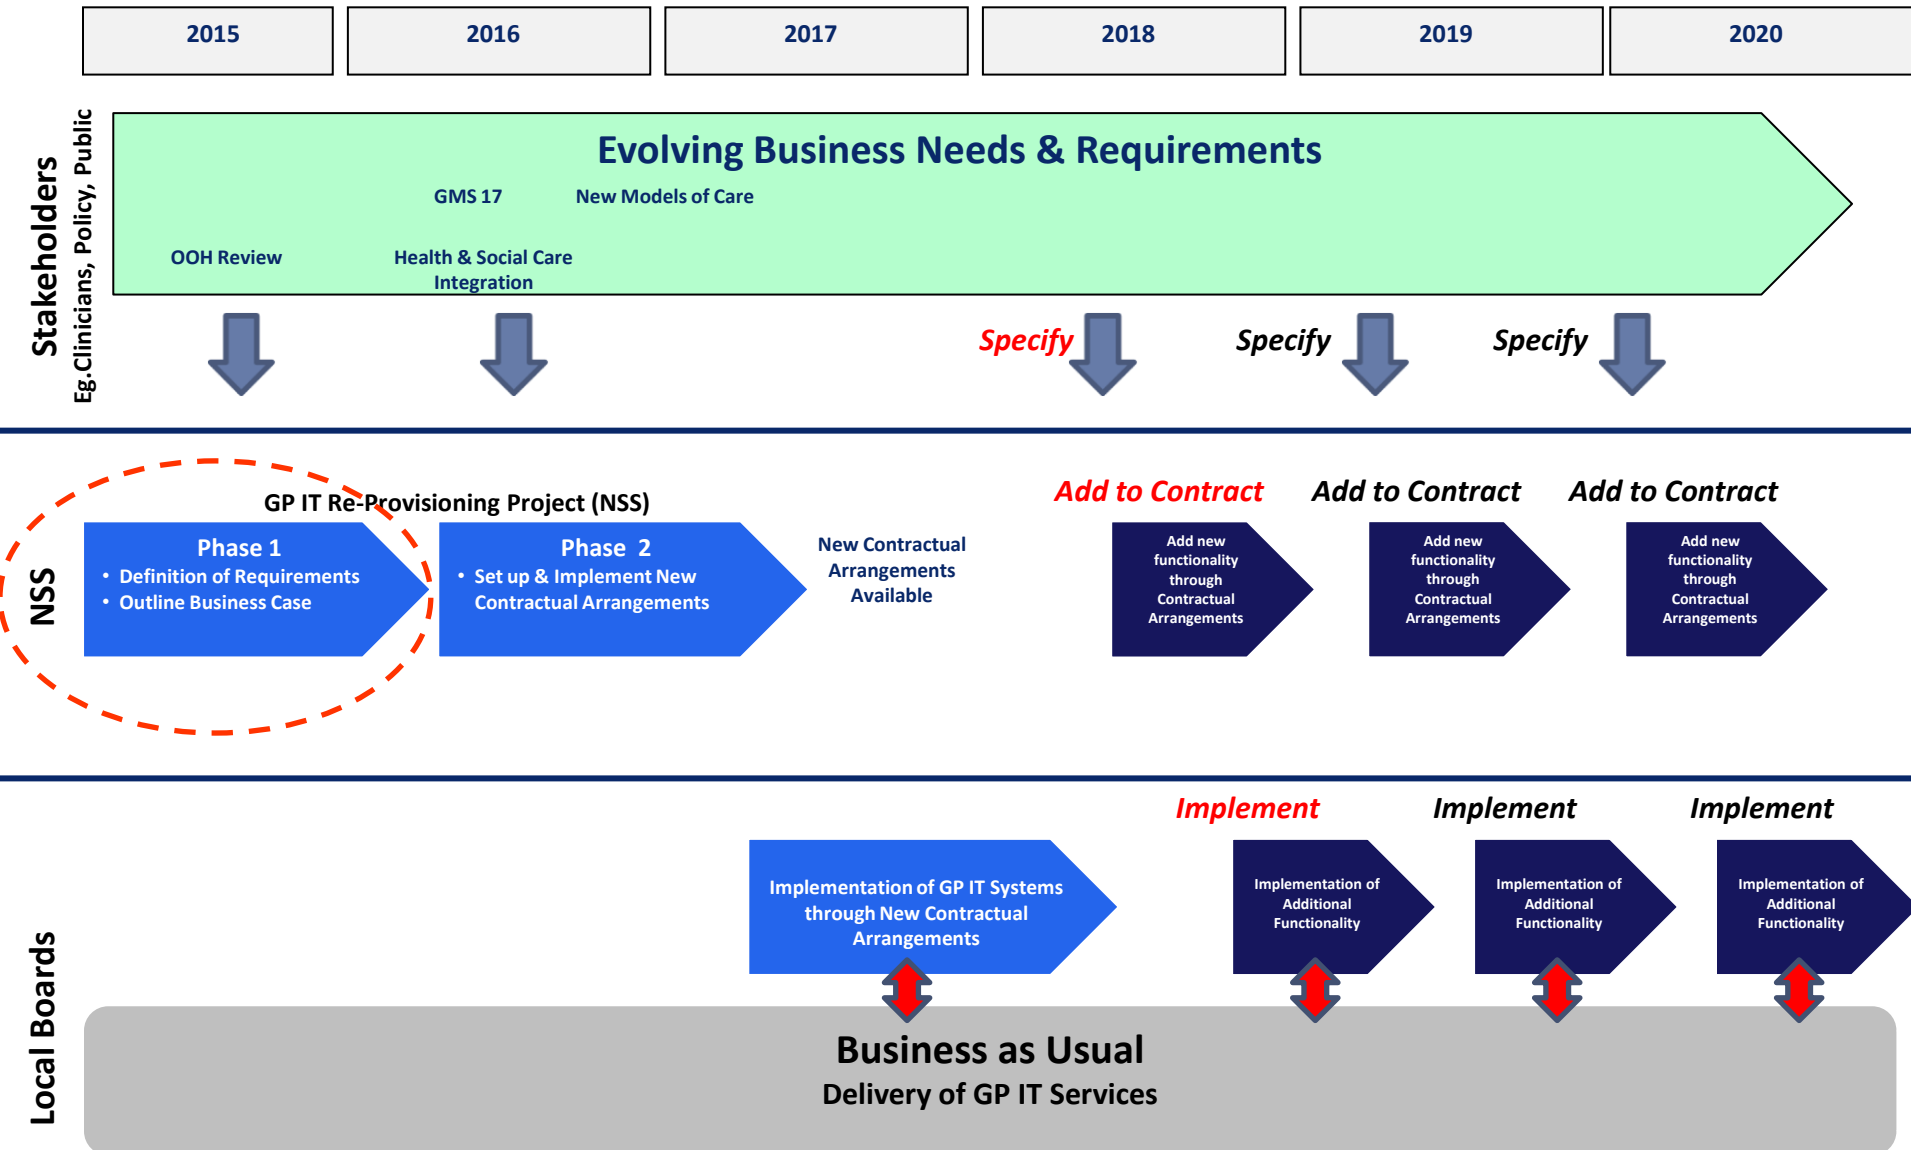

Step 2 HOW to buy it?

- Product vs Service (VAT Recovery)
- National vs Local Contract
- Re-Provisioning Options
 - Use Existing Frameworks
 - Solution Sourcing
 - Use English/Welsh/N.Ireland frameworks eg. G Cloud, GPSoCR etc
 - OJEU
 - Combination of the above
- Risk Assessment of Options

Deliverable

Outline Business Case

Timescales and Approach

Our understanding.....

The Health & Social Care landscape is continually evolving

Business requirements should drive the IT, NOT the other way around

We need to identify the business problems first. Then create clear requirements to deliver IT solutions that will truly assist in addressing the problems

It cannot all be fixed over night.....we must prioritise

Considerations.....

- 2020 Vision
- eHealth Strategy
- GMS contract
- Primary Care priorities
- Out of Hours Review
- Evolving Models of Care

Interactive Workshop

What could be better in relation to your primary care environment?

- Current problems and future fears in general? Yellow
- What IT requirements are essential? Pink
- What IT requirements are desirable/ nice-to-have? Green

Focus the discussion into the following 5 board areas;

- ❖ Clinical Support Process
- ❖ Prescribing and Medication management
- ❖ Interface between GP and Secondary Care
- ❖ Interface between GP and Community Care
- ❖ Administration functions

30 minute discussion within your group

5 minutes to write your **top 3 priorities per question**
