

Primary Care in Scotland looking to the future

Dr Lucy Munro, Primary Care Division,
Scottish Government

Today's workshop

- Recap from Deputy CMO plenary
- Context
- Small groups – reflections so far
- Small groups – enablers of quality in practice
- Feedback – for Deputy CMO

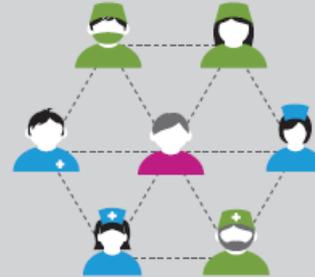

REALISTIC MEDICINE

CAN WE:

CHANGE OUR STYLE TO
SHARED DECISION-MAKING?

BUILD A **PERSONALISED**
APPROACH TO CARE?

REDUCE **HARM**
AND **WASTE**?

REDUCE **UNNECESSARY**
VARIATION IN PRACTICE
AND **OUTCOMES**?

MANAGE RISK BETTER?

BECOME **IMPROVERS**
AND **INNOVATORS**?

Primary Care Strategy

The longer term vision for primary care is that by 2030 primary and community care will be at the ***heart of the healthcare system***, with highly skilled ***multi-disciplinary teams*** delivering primary care within ***locality clusters***, GPs involved in ***strategic planning***, and patients being more ***informed and empowered*** than ever, able to directly access the ***right professional care at the right time***, and remaining at or ***near home*** wherever possible

The case for change....

- **the world is changing**
 - Demographics
 - Health and Social Care integration – the new world
- **keeping people in the community is right thing to do**
 - Staying at home or homely setting is what people want
 - Investment in primary care is cost effective
- **the status quo is not sustainable**
 - The system is under growing pressure
 - All professions are keen to operate to the top of their professional capabilities
 - Health inequalities demand creative responses

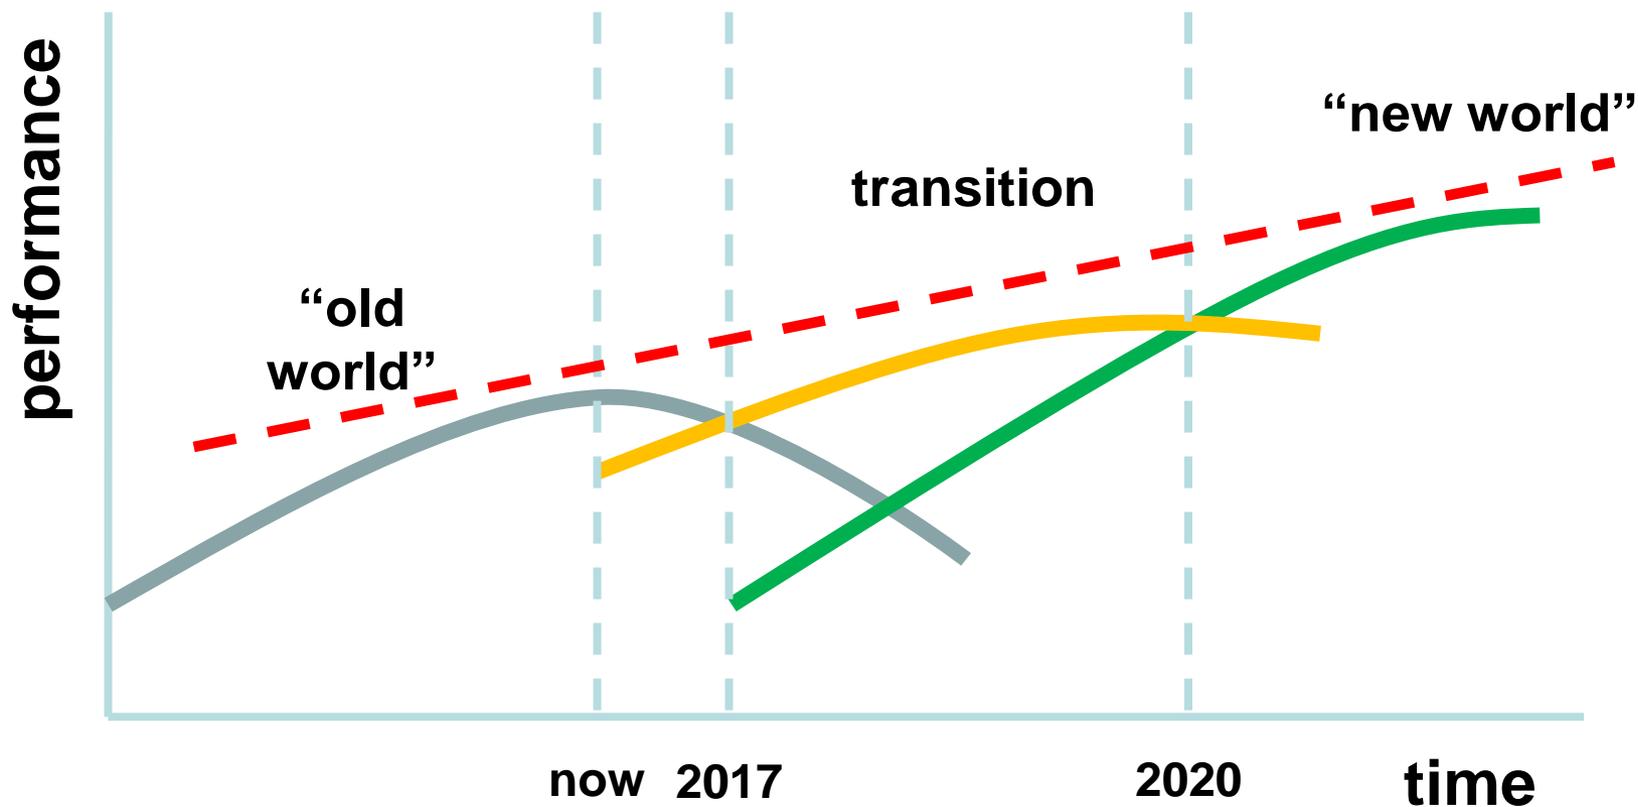

Future Role of the GP; quality and leadership

- Through a 'peer led, values driven, quality process'
 - Professionalism in care delivery at an individual practitioner level
 - Cluster working across practices
- Practice Quality Lead; role within practices
- Cluster Quality Lead; role across practices

Expected Benefits

- Continuous Quality Improvement is an intrinsic part of every practice (and practitioner within)
- A greater focus on outcomes that matter (to individuals and communities)
- Practitioners have a voice in the wider health and social care system; with the aim of improving outcomes by action across the whole of the patient pathway

Transforming primary care

From a prescriptive contract to an enabling contract

The Scottish Government

Peer Led, Values Driven, Quality Process Enablers – using our assets

- GP Clusters - common purpose
- Practice Quality Leads – protected time
- Cluster Quality Leads – boundary spanners

- QI tools
- Evidence base simply presented
- Analytics
- Continuous professional development
