NOTES	
1. These codes are a recommended list of codes. If no appropriate code is found in this formulary you may need to find a more suitable code by searching the whole Read code thesaurus (as in your clinical system).	
2. Codes that are relevant to the GMS Contract are indicated by a 'C' in the first column. Not all Contract codes are included in this list. The full list can be accessed via New GMS Contract Guidance and Searches webpage on the SCIMP site.	
3. Codes are presented in Chapters as they appear in the Read Code hierarchy. Within each chapter they are listed alphabetically/numerically by code using the preferred terms. Some synonyms are indicated where these may be more appropriate.	
4. Codes added in version 4.0 are highlighted in red
